

You are cordially invited to a

“Doctoral Research Symposium”

Dates: Friday, November 27th and Friday, December 4th

Time: 12:00 h – 14:00h on both dates

Place: Vanemuise 46, room 137

Friday, November 27th

Below-ground vs. above-ground plant diversity

Inga Hiiesalu

Department of Botany

Defining meaningful places of person's every-day activity space using mobile phone positioning data

Olle Jarv

Department of Geography

Effects of leaf litter addition and removal on small scale plant diversity

Maarja Kukk

Department of Botany

Depression in Estonian youth: genetic and environmental factors

Triin Kurrikoff

Institute of Psychology

Faculty of Social Sciences

Specificity of pseudouridine synthase

RluD in *E. coli*

Margus Leppik

Institute of molecular and cell biology

Public order in international private law

Ragne Piir

Department of Law

Can PHA injection have a long-term impact on bird health?

Tuul Sepp (Sarv)

Department of Zoology

Friday, December 4th

Modelling the electrified metal-water interface

Vladislav Ivaništšev

Institute of Chemistry

Genetic structure of large plasmid pNAH20 from bacterial strain

Pseudomonas fluorescens PC20

Jekaterina Jutkina

Institute of Molecular and Cell Biology

The influence of litter layer on seed emergence and growth rate

Kadri Koorem

Department of Botany

Island floral diversity and dynamics: the Islets of Väinameri, Estonia

Kertu Lõhmus

Department of Botany

Ventilator-associated pneumonia in very low birth weight neonates

Helgi Padari

University Hospital

Evaluation of the origin of Estonian honeys by amino acid content

Riin Rebane

Institute of Chemistry

Oxidative stress and bird plumage

Elin Sild

Department of Zoology

Unusually high metabolic activity of 4- and 5-ring polycyclic aromatic compounds in fish kidneys

Randel Kreitsberg

Department of Zoology
